Statement

No. 3020 - 1148

for the product

Mineral foam board

Producer:

poratec GmbH Dämmstoffsysteme

Industriestraße 13

D-96120 Bischberg-Trosdorf

This report may only be reproduced and published in unabridged and unaltered form.
Any other use, even of excerpts or quotations, must be explicitly approved by the IBR.

Product

The product mineral foam board is a purely mineral insulation board with low density. The product is mainly used in the building industry as a thermal insulation material. The board has been tested by the Institut für Baubiologie on the basis of the IBR test guidelines and has been awarded the IBR test seal. The current certificate no. 3019-1040 is still valid until May 2021.

Statement

In addition to our expert report and after renewed verification and review of the formulation with details of all ingredients submitted by Poratec GmbH Dämmstoffsysteme on 16.07.2020, we can confirm that the product

- is not produced with flame retardant products
- is not produced with blowing agents that reduce ozone
- no lead catalysts are used
- does not contain resins or expandable polystyrene
- does not contain mineral wool

According to the formulation, none of the listed compounds/materials are used in the production process, nor are they contained in the mineral insulation board itself.
